T SHIRT BAGS

Without a doubt, shopping is made easier and more enjoyable when you don't have to worry about the hassle of how you are going to carry your purchases home. Globally, the T Shirt carrier bag has made it easy for people to shop and allows for people to buy more because of the ease in carrying it all home. Plastic T Shirt carrier bags are the most practical way of carrying your purchases from the store to your home. They are more environmentally friendly than paper bags. They reduce the need to have to drive to the store because you can carry your purchases in a bag on public transport or by walking. With the proper management of waste, Carrier bags can be recycled and reused with minimum harm to the environment. We are able to customize your T Shirt bags with your own unique printing, design, size and thickness to help assist your customers shopping experience at your store and carrying them home.

T Shirt Bags Heat Seal

T Shirt Bags Heat Seal have a durable bottom seal created by a high heat sealing technique. The bags are strong and can hold a heavier weight. They are often seen used in supermarkets and local shops.

.....

T Shirt Bags Flat Seal

T Shirt Bags Flat Seal are convenient for storage of lightweight items which need to be carried from place to place. The bottom of the bags has a good aesthetic appearance, which is created by using a low heat sealing technique.

.....

T Shirt Bags with Glue Spot

T Shirt Bags with Glue Spot are designed as a convenient way for cashiers' to dispense the bags. They are designed to dispense easily with one hand and open automatically when dispensed. This type of bag is commonly used in high volume supermarkets.

.....

T Shirt Bags Embossed

Embossing the T Shirt Bag gives the film a more premium effect. A unique engraved pattern is created on the surface of the film which increases the ease in opening the bag. These bags are strong and hold weights required by everyday shoppers.

.....

Oxo-Degradable T Shirt Bags

Oxo-degradable T Shirt Bags are manufactured with an additive which accelerates the destruction of the plastic film. Bags are marked with a date of manufacture, and from that date, the plastic will begin to degrade in approximately 12-18 months. And completely degrade in 24-36 months depending on the amount of degradable additive added. These bags degrade into plastic dust and thus do not release CO2 into the atmosphere.

.....

Biodegradable T Shirt Bags

Biodegradable T Shirt Bags are made from a natural material, usually Starch based, and are intended to degrade in composting facilities where they disappear in a short timescale, leaving no waste, methane or harmful residues.

.....

T Shirt Bags on Roll

The T-shirt Bags on Roll come in a roll making them easy to dispense and store. The bags are widely used in supermarkets to contain all types of items such as vegetables, fruit, meat products, stationery, confectionery and more.

.....

T Shirt Bags with Additional Closing Tie

T shirt bags with additional closing tie are an inexpensive bag and can be used for carrying many types of products. Bags are manufactured with long and strong closing ties in between the handles and are designed for convenient and secure closure. These bags are very popular in Japan and mostly used in supermarket.

.....

GARBAGE BAGS

With out the proper management of waste, it can lead to an unhealthy and unappealing life style. Garbage Bags assist in proper waste management within communities as small as a simple household to communities as large as a municipality or city. Garbage bags come in many shapes, strengths, sizes and color. We are able to customize your Garbage bags with your own unique printing , design, shape, size, closure, color and thickness to suit the demands of each market globally and to assist in the proper waste management of communities.

Garbage Bags Heat Seal

Garbage bags with heat seal are commonly used in public areas and households. The bags are made from resins that are highly resistant to puncturing and tearing. The bottom of the bag is sealed with a high heat sealing technique leading to the durable base. The bags can be used to store wet, dry, heavy, hard, soft, organic or non organic waste generated from households, businesses, or communities.

.....

Garbage Bags Flat Seal

Garbage bags with flat seal are commonly used in households and offices. The bag has a good aesthetic appearance as the, sealing at the bottom of the bag is created with low heat technique. These bags are commonly used as liners and to contain light weight litter.

.....

Star Seal Garbage Bags

The Star Seal Garbage Bags have a strong and neat seal. Unlike a regular sealed Garbage bag where the weight of the contents is supported by a single sealed line, the star seal disperses the weight across a star shaped cross seal which allows the bag to carry more weight. The bags come in a roll, which is easy to dispense and store.

.....

T Shirt Garbage Bags

The T Shirt Garbage Bags make it easier to contain and dispose of garbage. When the bag is full, tie the two handles together to secure the garbage and lift the handles to remove from bin and dispose. The bags can be made white and thus are aesthetically pleasing making them suitable for household use in the bedroom, kitchen and bathroom. These bags are also commonly used in hotels and public facilities.

.....

Extra Thick Garbage Bags

Extra Thick Garbage Bags have the strength and durability to hold heavier and sharper objects. The tensile strength is enhanced with the extra thickness making the bags harder to tear and puncture. These bags are suitable for heavy industrial use, home and garden use, and public area use.

.....

Garbage Bags On Roll

Garbage Bags on Roll are durable, high quality, and odorless bags suitable for general garbage disposal. The bags come in a roll making them easy to dispense and use less space to store. Garbage Bags on roll are most commonly used in the EU and USA markets

.....

Garbage Bags Flat Pack

Garbage Bags Flat Pack are commonly used in the Japanese and Australian markets. They come in a neat PE or PP outer flat packaging. The package usually has a large area for printing a bigger logo and promotional contents making them attractive on shelf and when stored at home.

.....

Clear Garbage Bags

Clear Garbage Bags are suitable for use in public areas as the contents of the garbage bag are visible externally. The bags are strong and durable fit for use indoors and out. The Bag has a good aesthetic appearance thus also making it perfect for use in bedrooms and bathrooms. A common place for use of such bags is in Hotels, Hospitals and Airports.

.....

Draw Tape Garbage bags

Draw Tape Garbage Bags have the easiest closure mechanism for garbage bag. They are highly durable bags suitable for garbage containment and storage of general items. Secure closure of the bag is made easy with the use of a drawtape mechanism. Once the bag is full, draw the tape to close the bag and dispose.

.....

Garbage Bags with PP String

Garbage Bags with PP String are strong Garbage Bags with a PP String attached to the bottom seal and hidden along the length of the gusset. The PP string serves as a reliable closure mechanism once the bag is full. It allows the user to easily close the bag with a readily available string.

.....

Garbage Bags with Twist Wire

Garbage Bags with Twist Wire come with the colorful plastic twist wires for a secure closure. The twist wires are designed for easy use by twisting the wire to tie the top of bag before disposing.

.....

Multiple Layer (2/3) Garbage Bags

The Multiple Layer (2/3) Garbage Bags are HDPE/LDPE/LLDPE co-extruded films. The extra layers of film make the bags stronger and able to hold heavier items. Also, the colors of the inner and outer layers of the films can be different from one another thus improving the aesthetic properties.

.....

Car Garbage Bags

The Car Garbage Bags are popular for car lovers and family vehicles. The bags are commonly used to store used tissues and other waste in the car. Such bags come with tie handles, which make them easy to close and dispose of. They are also made to a size where they fit all types of special bins use.

.....

Biodegradable Garbage Bags

The Biodegradable Garbage Bags are earth-friendly compostable bags. The bags are thick and strong and usually made from a starch based material. Composting is a more preferable method for diverting your waste from a landfill.

.....

Oxo-Degradable Garbage Bags

Oxo-degradable Garbage Bags are manufactured with an additive which accelerates the destruction of the plastic film. Bags are marked with a date of manufacture, and from that date, the plastic will begin to degrade in approximately 12-18 months and completely degrade in 24-36 months depending on the amount of degradable additive added. These bags degrade into plastic dust and thus do not release CO2 into the atmosphere

.....

ZIP LOCK BAGS

A fairly new and innovative bag, the Zip Lock is commonly used in all industries such as manufacturing, catering, food, financial, hospitality, government institutes and also in the house hold. With the films impermeable properties and secure closing mechanism, the bags are used to store all kinds of items. The LDPE film is strong and yet flexible enough to serve the need to reseal the bag several times. The bags have many applications for storing food and even freezing food. They are used for storing general items such as stationary, money, peripherals, dry food and more. We are able to customize your Zip lock bags with your own unique printing, design, shape, closure profile, color, thickness and size.

Saddle (Deli) Zip Lock Bags

Saddle Zip Bags are an easy and convenient way to store and dispense the zipper bags. The bags are made in pairs joined together at the top by a perforated saddle. Several of these pairs of bags are then stacked and sealed together with a hot melted punch. The hot melted punch then serves as a hole to place the bags on a dispensing unit of fixed wicket installed in a deli or grocery shop. When there is a need for a bag, the bag is simply torn off the perforated saddle and used as desired.

.....

Double Lock Zip Bags

Double Lock Zip Bags are strong and convenient for storing various items such as vegetable, fruit, cosmetics, yarn, business cards and so much more. The bags have a long-lasting double lock closure profile which gives you the confidence that your storage items are highly protected from unwanted agents passing through the film and closure profile

.....

Multicolor Zip Bags

Zip Bags can be made out of multicolored films and are intended to make your life just that little bit more colorful. The Bags are suitable for kids to enjoy their lunch at school by having a different colored bag each day. Each pack of zip bags can have up to 5 different color films.

.....

Soup Zip Bags

Soup Zip Bags are designed for heating food in a microwave. The bags are extra thick to withstand the heat at defrosting temperatures of a microwave. They are also strong and safe enough to store hot food such as recently made soups. With these bags, you can store your food with out having to worry about the messy Tupperware or other storage to clean up. On top of this, the bags have a bottom gusset which helps them to stand up during storage or while filling in the contents.

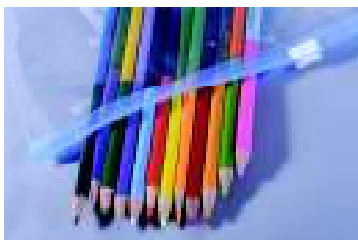

.....

Salad and Grape Zip Bags

Salad and Grape Zip bags are commonly used in household to keep salad for longer. Salad bags can help customers to keep salad fresh in refrigerator with small ventilation. Furthermore, the bags also come with high quality zip in order to be sealed tightly. With larger ventilation holes, the bags can also be used for storing Grapes sold in supermarkets or at home.

.....

Slider Zip Bags

Slider Zip Bags can be described with one word, "Convenience". The slider zip bags close and open quickly and easily the first time and every time. The bags are great for a wide variety of packaging.

.....

Double Zip Bags

Double Zip Bags can protect your storage contents with a double closure mechanism which ensures a tighter closure, keeping your contents safe from unwanted external matters. These bags can be used in households, hospitals, science labs, industrial use, restaurants, and more.

.....

Single Zip Bags

Single Zip Bags are durable bags that can be used for numerous purposes, whether it is food, specimens, medicine, hardware, electronics and much more, the bags are of a superior quality with a tight seal. These bags can be used in households, hospitals, science labs, industrial use, restaurants, etc. The advantage of using a zip bag over regular bags is the resealability function of the bag and the fact that the bag is strong and durable.

.....

Food and Freezer Bags

The Food & Freezer Bags are suitable for the storage of food. The high Zipper profile quality ensures a tighter seal of the contents and thus further preserves the food. The bags come in an attractive outer dispenser making them even more convenient to use, store and transport. Having a thickness of up to 70 microns, the bags are suitable for storage in a freezer and can be used for defrosting in a microwave.

.....

Multiple Wall (3/4) Zip lock Bags

The Multiple Wall (3/4) Zip Lock Bags are made with consideration of safety and convenience factors. These unique bags incorporate a zipper specimen bag and separate pouches for storing documents or labels. The reclosable zip bag protects the handler from coming into contact with the contents as well as keeping the contents safe from contaminants such as dirt and moisture. As for the document/label pouch, it is a helpful way of keeping information from being lost and helps to properly identify the contents.

.....

Click Zip Bags

The Click Zip Bags come with the special zip which makes a noise and gives a clicking sensation when the male and female zips are securely sealed. Such bags are suitable for children to put their snacks in and take to wherever they go, including school. As well as enjoying the sensation of closing the zip, it also makes the user aware that the zip is securely closed.

.....

FOOD BAGS

Every food retail outlet can not do without such bags. Whether it is behind the fish, meat, bakery, vegetable or dairy counter, store staff use food bags to store all food items. Even though the primary purpose of going to a store for a shopper is to buy food, they tend to avoid coming into direct contact with the food for hygiene and health reasons. Due to the impermeability and cleanliness of plastic film, it serves as the best form of packaging for food with no other alternative. Food bags come in many shapes and forms and we are able to produce a great variety with customized sizes, printing, and color.

Deli Bags (Bread Bags)

The Deli Bags are made to preserve freshness of different kind of breads, biscuits, sandwiches or bakery items. The bags are designed to be dispensed easily with one hand and to open naturally when dispensed.

.....

Preserved Bags

The Preserved Bags work by absorbing and removing ethylene gas, which is given off by all fresh fruits, vegetables and cut flowers which causes them to ripen and rot. As a result, any fresh vegetable/fruit produce that are stored in these bags will have an extended life and can be preserved for longer. These bags are suitable for storage of fresh produce at home in the Kitchen or in the fridge.

.....

Produce Roll Open End Bags

The Produce Roll Open End Food Bags are perfect for use in supermarkets. They are the most common form of bags used in the supermarket's food sections. All types of vegetables, fruit and other food can be stored in these bags for weighing and containment before paying at the checkout counter. The bags are of high quality and thus leakage of liquids from food is contained. The bags are stored on a roll with a perforated separation between each bag making it very easy to dispense.

.....

Produce Roll T-Shirt Bags

The Produce Roll T-shirt Bags are also widely used in supermarkets. All types of vegetables, fruit and other food can be stored in these bags for weighing and containment before paying at the checkout counter. The bags are of high quality and thus leakage of liquids from food is contained. The bags are stored on a roll with a perforated separation between each bag making it very easy to dispense. Moreover, the Tie handle (T Shirt) mechanism allows the bags to be easily closed and carried.

.....

Open End Food Bags Flat Pack

The Open End Food Bag is a simple and easy to use bag that can be used to store food and some liquids. The bags high quality property keeps its contents safe from external elements. Rather than being on roll, these bags are folded and packed into an outer bag. The way they are folded and packed makes it easy to dispense one bag at a time. With friendly to use space-saving packaging, this bag is suitable for household and restaurant use.

.....

Open End Food Bags with Twist Wire Tie

Performing the same function as other food bags, this finished product's high quality property keeps its contents safe from external elements. This product does however have an additional value adding feature which is the twist wire closure mechanism. Every pack of bags will have an equal number of twist wire ties to be used in closing the bags. Due to the easy to close feature, they are commonly used in households for storing frozen and non frozen food.

.....

Press and Seal Bags

Press and Seal Bags are another form of resealable bag. They are thinner than the Zipper Bag thus they are often cheaper. The closure of this bag is a food safe cohesive which allows for resealing the bag several times. They often come in the size of a sandwich and thus are practical for those who pack a Sandwich for lunch.

.....

Salad Bags

Salad bags are commonly used in households to store their left over or pre-prepared salads. With small holes pierced throughout the entire surface of the bag, the salad is kept ventilated and thus can be kept fresh for longer. Also, excess water from washing the salad is allowed to leak out leaving the salad fresh and dry ready to eat.

.....

Deli Sheets

A lot of stores require the use of Deli Sheets to wrap and line many types of food and food packaging. Deli Sheets are basically thin layers of film used for wrapping breads, cakes, sandwiches, fish, ham, and cheese. It helps to keep food fresh and also hygienically protected. The Sheets are commonly designed to be attached to a block header to allow for more efficient dispensing required in high volume supermarkets.

.....

Fold Top Lock Bags

The Fold Top Lock Bags are made to keep your sandwich nice and fresh. The bags are designed by having fold top lock in order to keep the freshness of food, which are great for transporting your lunch from home to work or school, or wherever else you are going.

.....

FASHION SHOPPING BAGS

We are able to customize your Fashion Shopping Bags with your own unique name and design. Size and thickness can also be customized.

Soft Loop Bags

Soft loop bags are widely used in shops, supermarkets, and department stores to contain and carry items. They are often the bag of choice for high-end retailers or branded products because of their neat appearance and the more sophisticated printing applications. Also, because they are usually thicker than the regular shopping bag, they can be used more than once and shoppers may bring these bags back to the supermarkets to be used again.

.....

Patch Handle Bags

The die-cut patch handle bags are similar to a punch out bag but with extra reinforcement around the punched handle. With an addition of an extra layer of film around the punch hole, the shopper is able to store heavier items in the bags without the handles tearing. Like the soft loop bags, they are often the bag of choice for high-end retailers or branded products because of their neat appearance and the more sophisticated printing applications. Also, because they are usually thicker than the regular shopping bag, they can be used more than once and shoppers may bring these bags back to the supermarkets to be used again.

.....

Punch Out Bags

Punch out bags are thick shopping bags with a die-cut handle usually shaped as an oval or kidney. This bag does not have an extra patch of film around the die cut handle like the patch handle bag, so the items being carried in this bag are usually lighter. Never the less, there is also the option of folding the top of the bag and sealing it to make a double layer before punching the handles. Similar to the patch handle and soft-loop bags, this bag is often the bag of choice for the high-end retailers or branded products.

.....

Side Punch Out Bags

The Side Punch Out Bags are the same type as Punch Out Bags, but have the die-cut handle at the left or right side instead of the top of bags. The bags are commonly used to contain newspapers or magazines and thus are the bag of choice for many book stores or newspaper stands.

.....

Wave Top Bags

The Wave Top Bags are high quality plastic bags along with a wave shaped top with die cut handles and are available in a variety of sizes and colors. Rather than the holes for carrying the bag being punched into the side of the bag, the side walls of the bags are extended up into a wave shape where the holes are punched. This allows the bags to have more usable storage area than regular punch out bags.

.....

Draw Tape Shopping Bags

The Draw Tape Shopping Bags are elegant, tough and strong. The bags are applicable for hotel valet services, laundry bags, golf tournaments, trade shows, etc. The bags are very durable and reliable, while the draw tape top allows for a secure and easy closure while providing a convenient and comfortable handle. Moreover, such bags are more economical because the storage area of the bag is maximized.

.....

Punch Out Bags with Zip

The Punch Out Bags with Zip are offered with a value added feature of a resealable closure. There is a large zip at the top of the bag ensuring a tight seal of its contents. There is also the punch out section above the zip which serves as the handles for carrying the bag. Like the regular punch out bags, these bags can be printed with custom designs improving the aesthetics of the bags. They are often used to carry and store high value items or common controlled substances such as medicine.

.....

Semi-Punch Out Bags

Semi- Punch out bags are thick shopping bags with a die-cut handle usually oval or kidney shaped. The difference between the Semi-Punched and Full-Punched handle is that for the Full-Punched handles, a distinctive hole is left after the punch. For the Semi-Semi Punched, there is a flap remaining to cover the hole after the punching process. When the bags are used, this flap folds upwards, serving as a reinforcements for the holes making them stronger handles. Similar to the patch handle and soft-loop bags, this bag is often the bag of choice for the high-end retailers or branded products.

.....

Flip Handle Bags

The Flip Handle Bags are designed in such a way that it minimizes the movement of the bag when it is carried. They usually have a large bottom gusset and thus are suitable for holding cake. During storage of the bags in the pack, the handles are neatly folded inside the bag. To carry the bag, these handles are flipped out of the bag and this action automatically puts the bag into shape ready for the transport of fragile items such as cake. On top of this, the handles are flipped out in such a way that it serves as a larger surface area for carrying. This increases the strength of the bag and makes it the most comfortable bag to carry.

.....

BLOCK HEADER BAGS

Most supermarkets have to serve thousands of customers everyday. This makes it vital for them to be able to provide quick and efficient service in order to maintain customer satisfaction. Packing the food into bags behind the deli and checkout counters are often very time consuming. One of the quickest ways to do this is to use Block Header Bags. A Stack of bags attached together with a block of plastic at the top of the stack is called a Block Header Bag. The block of plastic usually has holes for hanging the bags behind the counter. The bags are connected to the block with perforation making it easy to dispense from the block.

Block Header Open End Bags

The Open End Food Bags are simple and easy to use bags that can be used to store both fresh food and non food products. Popular among Grocery Stores and Supermarkets, the bags are designed for quick and easy packing.

.....

Block Header Punch Out Bags

The Block Header Punch Out Bags are the popular items to contain light weight non food items such as greeting cards, magazines, jewelry, stationary, etc. The shapes of die-cut punched out handles are usually oval or kidney. The bags can also be custom printed to the design and colors that the customer wants.

.....

Block Header Deli Sheets

The Block Header Deli Sheets are widely used in supermarket and bakery shop. The sheets are used for wrapping ham, cheese, fish, and bread before being further wrapped by paper and put into a bag. They are attached to a block with perforation making them easy to dispense.

.....

SANITARY/DOGGY/NAPPY BAGS

Good hygiene is important to maintaining a good health. Plastic bags assist in keeping good hygiene and making it easier to dispose of unwanted waste. Unwanted waste such as used sanitary napkins, waste generated from pets, and used nappies can be stored in scented plastic bags before being disposed of in the bin. These bags are often degradable and thus will degrade once they reach landfill.

Sanitary Bags

The Sanitary Bags are designed as convenient and hygienic way of disposing tampons and sanitary napkins. Popular with airlines, hotels, and facility management companies, the bags have an effective fragrance to mask any unpleasant odors. There is also the option to make the bags degrade naturally once disposed of.

.....

Doggy Bags

The Doggy Bags are designed as a convenient and hygienic way of disposing of dog feces. The bags are scented and vest carrier shaped along with perfume which masks the smell of animal excretion. The bags are strong and of the highest quality thus effectively containing the contents of the bag and protecting the user.

.....

Nappy Bags

The Nappy Bags are designed as a convenient and hygienic way of disposing baby's Nappies. Each bag is a perfect size to hold nappies. They are easy to use and can be easily dispensed individually from either soft packs or dispenser boxes. Where ever you take your baby, you should have a pack of nappy bags to help make it easy and hygienic to dispose of nappies.

.....

PLASTIC SHEETS

Polyethylene sheets have the characteristic of being flexible yet impermeable to most elements. Thus, plastic sheeting is used for many applications. Plastic sheeting is used to line roads, protect pedestrians from construction debris, line tables, cover seats of a new car, and much more.

Table Cloth

Plastic table cloths are used to protect the table from being stained or scratched. There is an option of thick and durable table cloths that are designed to be used many times and easy to wipe clean, and there is also the option of thinner sheets which can be disposed of after being used once. Such products are suitable for restaurants which set the tables many times over. Table cloths can be printed with unique multicolor patterns and can come as on roll or folded flat packs.

.....

Builder/Construction Film

Builder/Construction Film is designed for construction usage. There are both HDPE and LDPE construction film as per customer's request. The product is widely used for stain or scratch protection from construction and to protect bystanders or pedestrians from falling debris. It is also often used to line roads before laying the concrete to protect the roads from water erosion.

.....

Shelf Liners

Shelf Liner is great for cabinets and on shelving. Such product is thick and durable, which is excellent for protecting ornate wooden furniture from scratches and dust. It can also be printed in multiple colors and thus can improve the aesthetics of old and worn shelving. Moreover, the product is also easy to wipe clean with damp sponge or cloth.

.....

Car Mat Liners

Car Mat Liners are suitable for car lovers who want to safeguard their car from passenger's dirty feet. Car Mat Liners are extremely popular in the rainy season and used extensively by car detailing and cleaning services. The mats can be printed with multiple colors and patterns to improve the aesthetics of a normally worn car floor.

.....

OTHER BAGS

There are numerous uses for plastic bags that King Pac Industrial is capable of producing for customers. Plastic has its unique properties irreplaceable by any other material and thus serves the most practical, environmentally friendly and efficient mode of conveyance and permeable protection. Some of the unique plastic bags/sheets that King Pac Industrial have produced, include Liquid carrier bags, Ice Bags, Piping bags, Aprons, Plastic Gloves, Umbrella Bags and many more.

Liquid Carrier Bags

Liquid Carrier Bags are used in warm countries where carbonated drinks are stored in bottles at room temperature. This is true especially at the local grocery shops where they want to save on electricity. The un-refrigerated carbonated drink is poured into the Liquid Carrier bags along with ice, making the drink refreshingly cold. The bags are strong and durable therefore leakage is not a problem. With a straw and with handles on the bag, the customer can walk out of the store into the hot climate with a cold refreshing drink

.....

Ice Bags

The Ice bags are designed as clear bags with a higher tolerance for subzero temperatures. The bags are strong, puncture resistance, and do not break at low temperatures. A lot of supermarkets sell packs of ice and the packs are usually made from Poly Ethylene film. These packs of ice are usually stored in the frozen food or ice-cream section of the shops.

.....

Piping Bags

The Piping bags are widely used to pipe semi-solid food such as creams and pastes by pressing them through a narrow opening at one end. These bags are often used in bakeries for cake decoration and can come in a variety of sizes.

.....

Plastic Gloves

The plastic gloves are designed to be economical and disposable. Commonly used in the catering industry, these gloves protect the food from coming into direct contact with the preparers hands. Most high class restaurants and hotels make it compulsory for their chefs to wear these gloves when preparing and serving food. These thin plastic gloves are also useful to protect hands from paint, ink, glue, other messy liquids.

.....

Plastic Apron

Plastic Aprons are thin disposable sheets of film that are perfect for protecting your attire during messy jobs. You can use these aprons in the kitchen, lab, workshop, art studio, or anywhere you feel your clothes need protection. They can be produced with thicker gauges and be used several times before disposal or they can be made thin and cheap and disposed of after one time usage. Either on roll or in a flat pack, they are easily stored in your home drawers and cabinets.

.....

Umbrella Bags

Umbrella bags are commonly used in the rainy season. After being in rain, a lot of water remains on the umbrella even after you shake a lot off. Such bags help prevent water from dripping all over a shopping mall's, office's or hotel's floors. When you enter such buildings, you often see an umbrella bag dispensing unit at the entrance. Just tear off one of the bags and slip you folded wet umbrella inside. The dripping water is held in the umbrella bag and ensures safe, dry, and clean floors.

.....

Can Bags

Can bags are designed especially to carry drink cans and are made to be durable and convenient. The size of bag is designed to fit the size of cans. The bags are capable of holding more than one can at a time and even though the cans have been opened, they will stay upright in the can bag and the liquids contained.

.....

Milk Bags

The Milk Bags are used by mothers with newly born babies to store breast milk. The bags are thick, durable and safe to use. These bags are made from certified high grade plastic and produced in clean rooms thus making them safe to consume from. With a tight zip seal closure, the milk is safely contained in the bag and protected from external elements during storage.

.....

Newspaper Bags

The Newspaper Bags are convenient to store piles of old newspapers collected over a long period. Such old newspapers have a resale value and can be sold for recycling. With a large bottom gusset, the newspapers can be neatly stacked and transported. The bags are very popular in Japan and widely used in book shops.

.....
